NOTE.—The two tables above (and other similar tables), must be read with some caution on account of changes of classification that were made before 1910, and at the end of 1930. From 1910 to 1930 the classification was substantially uniform. These tables are not affected by changes in classification made at the end of 1939.

METEOROLOGY.

SYNOPSIS OF THE WEATHER OVER TASMANIA FOR THE YEAR 1943.

The Rainfall for 1943 was slightly below normal, only a few scattered places receiving more than the average. District deficiencies were 3 per cent in the West, about 23 per cent in the Midlands, and from 10 per cent to 15 per cent elsewhere. As a whole, the Island experienced dry conditions throughout January, March, May, August, October, and December, with average rainfall in February, April, July, and November. It was the driest March on record over most of the North and East and at a few scattered places elsewhere. Hobart registered 2084 points, which was 312 points below the average.

Mean Monthly Temperatures, for the most part were below normal. Over average conditions were experienced in the East, West, and Central Plateau in January, on the Central Plateau in October, and in the Northern Division in November, otherwise temperatures were below or very close to the average. A heat wave was experienced towards the end of January when records were broken at several stations, but this was the only really hot period of the year. In February, and from April to September inclusive, mean temperatures were persistently below the average, August being a particularly wintry month with some record low temperatures and heavy snowfalls on the highlands. The highest temperature recorded was 104·1 degrees at Swansea on 28th January, and the lowest 14 degrees at Miena on 14th July. Hobart extremes were 101·8 degrees on 28th January, and 29·8 degrees on 27th June.

Atmospheric Pressure was below the average in January, February, June, July, and September, above in May and August, and very close to the normal in other months. Features during the year were the predominance of low atmospheric pressure over high pressure in July, and the tendency for depressions to develop cyclonic formation when in the vicinity of Tasmania during September. Extremes of pressure at Hobart were 28·939 inches on 21st April, and 30·706 inches on 16th May.

Crops, Pastures, &c.—Wet weather in the middle of January and throughout February interfered with harvesting and the picking of small fruits, but compensating factors were the benefit derived by the freshening of pastures and the replenishing of depleted water supplies. Very dry conditions throughout March threatened to produce a serious agricultural and pastoral position in all districts, but, with the exception of the Midlands, copious rains in April saved the situation temporarily. These good rains were not followed up in May, and this, together with cold temperatures, retarded growth of crops and pastures. This was particularly the case in the Midlands where the outlook was far from reassuring. June brought no relief to this or the Eastern Division, but an improved rainfall in most districts encouraged growth. Persistent cold weather throughout July and August resulted in a severe check to all growth, and stock which up to this stage had been progressing satisfactorily lost condition. Not until after the middle of September was any improvement manifest, and this was only partially maintained throughout October. November, however, was favoured with ample rainfall and prospects generally were good, but dry conditions over the Northern half of the State in December rendered conditions less satisfactory.

Monthly Weather Summaries.—Rainfall for JANUARY was over average at most places in the North-East and East, parts of the North-West, and at a few scattered places elsewhere, whilst falls over the remainder of the State fell short of the normal. District excesses averaged 13 per cent in the Eastern Division, 3 per cent in the North, and 1 per cent in the Midlands, whilst deficiencies ranged from 27 per cent to 35 per cent in the Derwent Valley and Central Plateau, and from 10 per cent to 12 per cent elsewhere. Most of the rain was recorded during the period 12th to 18th when all Divisions received a succession of light to moderate with occasional heavy falls. Mean temperatures were from ½-1 degree above the average in Eastern, Western, and Central Plateau Divisions, and about normal elsewhere. The latter half of the month was divided into two strongly contrasting periods, cool to moderate conditions prevailing from 15th (snow on the highlands) to the 20th, and warm to very hot temperatures thereafter, particularly on the 28th to 29th. On the 28th, Swansea, with 104·1 degrees recorded its highest temperature on record for all months, whilst the record for January was broken at St. Helens (102 degrees), Moina (96), Eddystone Point (94), Stanley (93), Springs, Mt. Wellington (90), and Miena (86). Hobart registered 101·8 degrees (the highest in January since 1905) and Launceston 97 degrees (the highest in January since 1900). An outbreak of bush fires occurred in many districts, but the absence of gales and a timely fall of rain enabled control to be maintained. During the period 12th to 18th, fresh to strong N.W. to S.W. winds were experienced. Hobart recorded a maximum velocity of 49 m.p.h., from the W., on the 25th. A feature of the month was the frequency of thunderstorms for these high latitudes, many stations reporting occurrences on the 2nd, 7th, and 12th.

FEBRUARY had an uneven distribution of rainfall. Most of the Western half and the Midlands received more than average, with under-average conditions elsewhere. District deficiencies were about 32 per cent in the Eastern Division, whilst excesses ranged from 50 per cent to 60 per cent in the Midlands and West Coast Mountain Region, and from 15 per cent to 30 per cent in the South and North. Results for the Central Plateau and Derwent Valley Divisions showed little departure from

normal. Most of the month's rain was recorded during four periods, the 24 hours ending 9 a.m. on the 2nd, 6th, 18th, and for the week ended on the 22nd. Thunderstorms accompanied the rain on the 6th and 21st. Mean temperatures were from 2½-3 degrees below the average in the Northern, Western, and Central Plateau Divisions, and from 1 to nearly 2 degrees below elsewhere. Although temperatures were mostly cool, no snow was reported from the highlands throughout the State. On the whole, the first half of the month was considerably warmer than the latter half. A feature of the weather was the development of a very severe gale in Launceston and suburbs early on the morning of the 21st. Much structural damage was caused and the telephone, telegraph, and electric lighting services were disrupted. The maximum wind gust at Hobart was on the 26th—48 m.p.h., from the West.

MARCH was particularly dry. Aggregates ranged from 2¼-5½ inches on the Western Highlands, from 1-1¾ inches in the extreme South and on parts of the Central Plateau, but elsewhere totals varied between ¼ and ¾ inch. The West Coast Mountain Region received about half the normal rainfall, the Central Plateau, Derwent Valley, and South-East about one-third, and the remainder of the Island from one-fifth to one-tenth. It was the driest March on record at very many stations in the North and East, and at scattered places elsewhere. One or two stations reported no rain and several registered less than 10 points. Hobart received 29 points the lowest monthly total since February 1936 (26 points), and the driest March since 1859 (26 points). Most of the rain was recorded during three periods, the 5th to 6th, 9th, and 28th to 29th. Mean temperatures were about 1½ degrees below the average in the Western Division and slightly above elsewhere. Warm spells occurred from 10th to 16th, and from 25th to 31st. Snow fell on the Western and Central Highlands on the 6th, and the most severe frost of the month occurred on the 9th. The maximum velocity attained by the wind at Hobart was 52 m.p.h., from the West, on the 17th.

APRIL proved to be very wet with the exception of a few places in the Midlands and East. The Derwent Valley and Central Plateau reported excesses of 70 per cent to 90 per cent, and the remainder of the State from 30 per cent to over 40 per cent surplus. During the first fortnight, the dry conditions which characterised the previous month continued, such rain as did fall being mostly of a light character. However, splendid soaking rains were recorded in all districts on the 15th and 16th, and were followed up to the 23rd by light to heavy falls in all districts except parts of the East and the Northern Midlands. Further useful falls were recorded over the North-Western half of the State on the 29th to 30th. Mean temperatures were from 2-3 degrees below the average in Western Midlands and South-Eastern Divisions, and from 1-2 degrees below elsewhere. Early morning frosts occurred inland on the 3rd, 4th, and 5th (severe on the last-mentioned date), and snow fell on the highlands on the 2nd, 8th, 20th to 23rd, and 30th (particularly heavy for April on the 22nd). April was a month of much wind, particularly from the 18th to 23rd. At Hobart, the maximum gust was 58 m.p.h., from the N.W., on the 6th. Other features of the weather were thunderstorms on the 6th and 19th.

MAY rainfall was below average in all parts of Tasmania except at a few places in the North-East, Central Plateau, and West Coast Mountain Region. District deficiencies were most serious in the Midlands which received about one-third of the average rainfall, whilst the South-East received approximately one-half, and the Northern and Eastern Divisions about two-thirds of the normal. In other parts of the State the shortage was slight. Over the Eastern Division the rain was evenly distributed throughout the month, but elsewhere considerably more rain fell in the first half. The 24 hours ended 9 a.m. on the 3rd were notable for substantial falls over the Northern half of the State, whilst the Southern Division was best served during the period 3rd to 6th. Mean temperatures were over four degrees below the average in the Western Division, nearly three degrees below in the South-East and Central Plateau, and from 1-2 degrees below elsewhere. Snow fell on the highlands on 4th to 6th, 14th, and 31st, whilst many frosts occurred from the 14th onward, being particularly severe on the 15th, 16th, and 23rd. So far as wind was concerned, the first fortnight of May—with strong and persistent N.W. to S.W. gusts—was in striking contrast to the remainder of the month when quiet and stable conditions predominated. At Hobart, the maximum wind velocity occurred on the 4th when 59 m.p.h., from the W., was registered. Fog was much in evidence on the 20th and 21st.

JUNE rainfall was below the average in the Eastern, Northern, and Midland Divisions, and over average elsewhere. The North, as a whole, received about four-fifths of the average, but in the East and Midlands the deficiency was about one-half. On the other hand, excesses above the average amounted to about 17 per cent on the Central Plateau and from 24 per cent to 33 per cent elsewhere. The rain was evenly distributed throughout the month with maximum falls occurring in the Western Division during the 24 hours ended 9 a.m. on the 3rd and 25th, and elsewhere during the first week and on the 20th to 22nd. An improved rainfall in most districts this month encouraged growth in crops and pastures but, unfortunately, persistent cold weather nullified somewhat the beneficial effect of the rain. Mean temperatures were about 2½ degrees below the average in the Western and Central Plateau Divisions, about one degree below in the North, and from 1½-2 degrees below elsewhere. Snowfalls occurred on the highlands at frequent intervals. Many severe frosts were reported away from the coast. The 29th was a particularly bleak day throughout the State, at Hobart the maximum temperature (40·9 degrees) was the lowest recorded in June since 1919 (40·8 degrees). Very disturbed conditions were experienced on the 7th when the wind at Hobart attained a maximum velocity of 63 m.p.h. A gust of equal velocity had previously occurred at Hobart on the 3rd. A feature of the month's weather was the influence of a cyclonic depression which traversed the North Tasman Sea from the 12th to 18th, resulting in prevailing winds from a South-Easterly direction over Tasmania. In consequence, the usually wet West Coast Mountain Region (which receives the major portion of its rainfall from N.W., W., and S.W. winds) enjoyed a week of almost unbroken fine and sunny conditions.

Dry conditions continued throughout JULY in all parts of the State except in the Central Plateau, Western, and North-Western Divisions where aggregates were over average. Surpluses in these areas were respectively 59 per cent, 32 per cent, and 23 per cent, whilst deficiencies ranged from 10 per cent in the Derwent Valley to 24 per cent in South-Eastern Districts. The rainfall was evenly distributed throughout the month—the heaviest fall being in the Western Division during the 24 hours ending 9 a.m., 13th, and elsewhere during the first week and 23rd to 26th. Mean temperatures were approximately two degrees below average on the Central Plateau, 1½ degrees in the Western Division, and elsewhere ½-1½ degrees below average. Snowfalls occurred at frequent intervals on the highlands and Central Plateau. On the 25th a general fall was experienced in the South-Western half of the State when ¼-inch was registered in Hobart. Many severe frosts were reported away from the coast. Except for the 3rd and 24th when boisterous conditions prevailed, the month was normal as regards wind velocity. On the 3rd, at Hobart, heavy squalls with gusts to 58 m.p.h., were recorded. The 24th was a very windy day, a number of gusts over 60 m.p.h. being registered, the highest shown being 68 m.p.h. from the N.W.

AUGUST was a dry and very cold month. District deficiencies were greatest in the Midlands which, as a whole, received less than half the average, whilst in contrast the Eastern Division was only 9 per cent below. The remainder of the State received from two-thirds to three-quarters of the normal. Over the North-Western half of the State most of August's rain fell during the first week, although some substantial falls were recorded from the 27th to the close. Elsewhere, totals were chiefly made up from numerous small amounts with light to moderate and a few heavy registrations on the 19th and 28th to 29th. Mean temperatures were nearly four degrees below the average in the West Coast Mountain Region, and from 2-3 degrees below elsewhere. The mean maximum temperature was the lowest on record for August at St. Helens, Swansea, and Cape Bruny, and the mean minimum was similarly the lowest on record at Moina and Zeehan. Heavy snowfalls occurred on the highlands during the first four days, the Central Plateau reporting a maximum depth of 19 inches. As a result of this, traffic on the main highway leading to the West Coast was suspended and could not be resumed until the 13th. Lighter deposits were reported on the 8th, 11th, 19th, and 20th. Frosts were very prevalent inland throughout the whole of August with the exception of the first few and the last few days. From the 9th to 23rd, anti-cyclonic control produced many cloudless nights thus favouring radiation. In consequence, frosts were particularly severe during that period. On the 12th, Miena reported a "louvred Screen" (4 feet above ground), minimum temperature reading of 16 degrees Fahr. Although the wind at Hobart attained a velocity of 56 m.p.h. on the 30th and 31st, comparatively quiet conditions prevailed over Tasmania during the preceding days of the month.

From a meteorological point of view, SEPTEMBER was a very active month. The rainfall was above average over most of the North-Eastern half of the State, and below average elsewhere. The Eastern Division as a whole was 83 per cent above—parts of the North-East receiving from 2 to 3 times the normal amount. The Northern Division also received more than the average—but only about 7 per cent—whilst the South-Eastern Division had a deficiency of nearly the same amount. Throughout other parts of the State a shortage of from 20 per cent to 30 per cent was experienced. Most of the rain fell during the second and third weeks with a maximum period on the 17th to 18th when heavy to very heavy amounts were recorded in Eastern and North-Eastern districts, and moderate to heavy almost generally elsewhere. On this occasion, floodings occurred, the South Esk River rising to a height of 14 feet 6 inches above summer level at Avoca and 14 feet above at Fingal, and the Wye River at Riversdale to 8 feet 3 inches above. Substantial, though somewhat lighter, falls were also recorded generally on the 10th and 21st to 22nd. Mean temperatures were about ½ degree below the average on the Central Plateau, about 1 degree below in the Northern Division, and from 2-2½ degrees below elsewhere. Frosts were prevalent inland on the 3rd to 6th, 14th to 16th, 25th, and 29th, whilst snow fell on the highlands on the 1st to 2nd, 12th to 13th, and 19th. The snowfall of the 12th to 13th was widespread and very heavy. The Lyell Highway was rendered impassable to traffic for over a week, the road being covered to a maximum depth of 3 feet 6 inches. In the Huon district, the fall was the heaviest known and telephone lines broke at several places from the weight of snow. At Triabunna, the fall was the heaviest for more than 26 years. Cape Bruny, Droughty Point, and New Norfolk reported the first snow for 20 years, and hills around Hobart including those on the Eastern shore—were covered down to the 500 feet level. Occasional light falls occurred in the city, but the snow did not remain on the ground for any appreciable length of time. A very severe thunderstorm occurred over North-West districts on the night of the 9th. The storm lasted from 7.15 p.m. till midnight and was described as one of the most severe in the last 20 years. It was accompanied by heavy rain and vivid forked lightning, several trees being struck and telephone systems being interrupted. Strong winds were not frequent during the month. The maximum gust recorded at Hobart was 53 m.p.h., from the N.W., on the 1st.

The rainfall for OCTOBER was above the average at a few places in the North-East, but over the remainder of the State aggregates were well below, many places in the Midlands, Derwent Valley, and Central North only receiving from one-quarter to one-third of the normal amount. District deficiences, as a whole, were about 68 per cent in the Derwent Valley and Eastern Division where the shortage was 28 per cent. The rain was evenly distributed throughout the month and was mostly in the form of light showers. Heavy falls, however, were recorded in the North-West and North-East on the 17th to 18th, and to a lesser degree in the North-East on the 25th. Mean temperatures were 1½ degrees above average on the Central Plateau, about normal in the Northern Division and Midlands, and from 1-2½ degrees below the average elsewhere. Cold snaps with snow on the highlands occurred on the 13th and 26th, whilst frosts were experienced inland on the 6th, 8th, 13th, 21st. and

27th. In consequence of the absence of steep pressure gradients, October was a comparatively quiet month, the period 18th to 24th being particularly tranquil. The maximum wind gust at Hobart was at the rate of 53 miles per hour, from the N.W., on the 5th. Southern Tasmania experienced a fairly severe thunderstorm on the afternoon of the 18th, but the remainder of the State was not affected.

From a rainfall production standpoint, over the State as a whole, NOVEMBER was the most satisfactory of the year. District excesses above the average amounted to 113 per cent in the East, 88 per cent in the Midlands, and 54 per cent in the South-East, whilst the Central Plateau and Derwent Valley received a surplus of from 15 per cent to 35 per cent. Little departure from the average occurred elsewhere. Most of the month's rain was recorded between the 3rd and 5th in connection with the passage across the State of a cyclonic depression. During this period, from 2 inches to over 5 inches of rain fell over the South-Eastern half of the Island, and mostly from 1-2½ inches elsewhere. Floodings occurred in rivers in the North-Eastern quarter and road traffic was impeded. The Wye River rose to 9 feet 6 inches, the South Esk 9 feet, and the Macquarie and Lake Rivers 7 feet 6 inches above Summer level. Further general, though lighter, falls were recorded on the 18th. Mean temperatures were nearly one degree above the average in the Northern Division, and from ½-1 degree below elsewhere. Light snowfalls occurred on the highlands on the 7th and 10th, and frosts of moderate intensity were reported inland on the 8th. Disturbed conditions were confined to the 4th to 10th and 28th to 30th. The wind at Hobart attained a maximum velocity of 42 miles per hour, from the W., on the 9th. Thunderstorms occurred on the 3rd and 17th.

DECEMBER was mainly a dry month, but a few places in the South, chiefly in the metropolitan area received slightly more than the average. District deficiencies were about 8 per cent in the South-East and 26 per cent in the West Coast Mountain Region, but elsewhere ranged from about 40 per cent to 70 per cent. With the exception of heavy falls recorded in the Western Division on the 1st to 2nd and in the South-Eastern quarter on the 4th, the month's rain was made up of light amounts spread evenly over the first half of the month and chiefly between the 23rd and 28th. A few thunderstorms were reported on the 3rd. Mean temperatures were slightly above the average over the Northern Division but elsewhere were about 1½ degrees below. A feature of the month's weather was the severe southerly storm which developed early on the morning of the 4th and persisted throughout the day with strong southerly winds reaching gale force at times and rough seas. At Hobart, conditions were disturbed from 2 a.m. to 5 p.m., being particularly severe from 5 a.m. to 1 p.m. with very frequent gusts 35 to 40 m.p.h., occasionally exceeding 45 m.p.h. The maximum gust was 55 m.p.h. at 8.55 a.m. During this disturbance the Hobart Bridge was subjected to a severe buffeting and some damage was caused from wave action.

The following is a summary of the Hobart monthly temperatures and rainfall for the year 1943:—

Month.	Mean Temperature.	Normal Temperature.	Rainfall (Inches).	Normal Rainfall (Inches).
January	61·8	61·8	1·67	1·84
February	61·0	62·1	1·46	1·51
March	59·9	59·4	0·29	1·76
April	52·7	55·1	2·97	1·94
May	48·3	50·7	0·66	1·83
June	45·3	46·9	2·66	2·21
July	46·1	45·9	1·34	2·13
August	46·3	48·1	0·98	1·85
September	48·9	51·0	1·57	2·07
October	53·0	54·0	1·31	2·29
November	51·1	57·1	3·48	2·41
December	58·2	60·0	2·45	2·12
Year	52·7	54·3	20·84	23·96

The highest maximum temperature was 101·8 degrees on the 28th January, 1943, and the lowest minimum 29·8 degrees on the 27th June, 1943. The highest maximum temperature on record is 105·2 degrees on 30th December, 1897, and the lowest minimum is 27·0 degrees on 18th July, 1866.

PRODUCTION: MANUFACTURING—TASMANIA.

YEAR 1942-43.

(Figures in parentheses are those for corresponding period of 1941-42.)

For statistical purposes in Australia a factory is an establishment engaged in secondary production, which uses power or employs more than three persons. Certain industries, however, such as construction works (buildings, wharves, bridges, and roads), threshing and slaughtering have never been included in the Australian schedule of manufacturing industries. In the year 1930-31, as the result of a resolution of the Conference of Statisticians, 1930, a new classification of industries was adopted; consequently care is needed when comparing class totals, as the groupings may not now be identically the same as in the years prior to 1930-31.

NUMBER OF FACTORIES.

During the year 1942-43 returns were collected from 992 (994) factories, a decrease of 2 compared with the preceding year.

HANDS EMPLOYED.

The number of workers employed in factories on an average for the year 1942-43, 18,310 (17,556), showed a considerable increase on the number in the previous year, and was the greatest number of workers yet recorded. The increase in workers during 1942-43 comprised 552 males and 202 females.

Some of the more important increases in total numbers of workers are shown in the following industries:—Jam, canning, and pickles, 1253 (1080); engineering, &c., 575 (377); and butter, cheese, &c. (which now includes ovaltine manufacture), 1099 (981).

The following table gives a classification of hands employed according to the size of the factory in which they work:—

PERCENTAGE OF WORKERS IN FACTORIES.

Classification of Factory.	Tasmania.					Australia.
	1921.	1939-40.	1940-41.	1941-42.	1942-43.	1941-42.
1- 20 workers	35	32	29	28	25	17
21- 50 workers	27	14	15	13	13	13
51-100 workers	15	11	9	10	10	11
101 and over	23	43	47	49	52	59
Totals	100	100	100	100	100	100

During the year 1942-43 the percentage of all workers in factories with over 100 hands increased to 52 (49), but the average number of hands in this class of factory decreased to 437 (472), thus reversing the steady upward trend of recent years.

The average number of workers for all factories in Tasmania during 1942-43 was 19·5, compared with 18·4 in 1941-42.

OUTPUT AND PRODUCTION.

The consideration of the activities of various industries requires differentiation between "value of output" or the gross value of goods delivered from the factory, and "value of production," or "net production," which is the value added to raw materials used in the factory in the process of manufacture. To obtain the actual value of the wealth so produced by factory processes the costs of manufacture must be as far as possible deducted from the value of output. Such costs are the value of raw materials used; wrappers and containers, the cost of fuel, power, light and water; tools replaced and repairs to plant; and depreciation. Wages, in relation to industry as a whole, are reckoned, not as a cost of manufacture, but as the share of the value of production accruing to labour from its co-operation with capital. At present, also, no reduction is made for depreciation owing to the impossibility of obtaining completely accurate and consistent figures.

The following table sets out the allotment of the gross value of output between these items for the last five years:—

	1938-39.	1939-40.	1940-41.	1941-42.	1942-43.
	£	£	£	£	£
Output	11,158,205	12,993,294	13,867,446 (a)	16,311,002 (a)	18,703,930 (a)
Raw material	4,613,978	5,410,648	6,188,288	7,460,857	8,696,382
All other costs (excluding wages and depreciation)	1,145,568	1,329,617	1,387,270	1,635,807	1,932,097
Net production	5,398,659	6,253,029	6,291,888 (a)	7,214,338 (a)	8,075,451 (a)
Labour cost	2,624,163	2,834,727	3,207,033	3,872,848	4,645,088
Unallotted balance	2,774,496	3,418,302	3,084,855	3,341,490	3,430,363
	%	%	%	%	%
Labour cost per cent of net production	48·6	45·3	51·0	53·7	57·5
	£	£	£	£	£
Net production per £100 labour cost	206	221	196	186	174

(a) Understated by approximately £725,000 (output) and £675,000 (net production), compared with 1939-40 and previous years (see note (d), Table No. 3).

The gross output for 1942-43 amounted to £18,704,000 (£16,311,000), and net production to £8,075,000 (£7,214,000). After deducting labour costs from net production, and "unallotted balance" of £3,430,000 (£3,341,000) remained for distribution among overhead charges and profits, together with an allowance for depreciation. Net production, which gives the best indication of the activities of the factories of the State, had for a number of years been valued at about £3,600,000, but with the onset of the business depression the values declined in 1931-32 to approximately £2,808,000, but increased in subsequent years to £8,075,000 during the year under review. For each £100 expended in salaries and wages, the average value of net production was £206 in 1938-39; £221 in 1939-40; £196 in 1940-41; £186 in 1941-42; and £174 in 1942-43. The aggregate cost of raw materials rose considerably during 1942-43, and amounted to £8,696,000 (£7,461,000), representing 46 (46) per cent of the total value of the output.

The following figures show the trend during recent years of net production in the chief industries:—

Industry.	Net Production.					Net Production per £100 of Labour Cost.
	1938-39.	1939-40.	1940-41.	1941-42.	1942-43.	1942-43.
	£	£	£	£	£	£
Lime, cement, &c. (a)	253,282	288,345	290,608	209,101	200,535	191
Sawmills	362,496	392,299	443,261	538,478	577,380	137
Metal extraction	1,163,179	(n)	(n)	(n)	(n)	(n)
Biscuits, confectionery, &c.	366,026	401,174	406,378	370,474	414,088	169
Jam, pulp, &c.	199,223	185,037	238,870	349,368	350,275	141
Woollen mills	416,609	650,738	817,967	957,458	973,721	196
Books, paper making, printing, &c.	450,250	619,000	840,593	1,179,926	1,157,641	237
Cycle and motor works	180,479	181,835	170,468	161,851	174,522	145
Heat, light, and power (excluding carbide)	707,882	771,800	175,688	147,702	247,201	509

(a) Including Carbide. (n) Not available for publication.

As may be seen from the table, the value of net production in 1942-43 was greater than in the previous year in most of the above industries.

LABOUR COSTS.

The total amount of wages and salaries for the year 1942-43 was £4,645,088, compared with £3,872,848 in 1941-42. The average payment to all workers, both male and female, for the year under review, was £254 (£221).

FIXED CAPITAL.

At the end of 1942-43 the value of fixed capital investments stood at £13,060,000, compared with £11,997,000 at the end of the previous year. Of this fixed capital, £4,927,000 (£4,384,000) was represented by land and buildings, and £8,133,000 (£7,613,000) by plant and machinery.

No. 14.—*PRINCIPAL Mills, Manufactories, Works, &c.*

GENERAL RETURN, 1942-43.

(For comparison of 1921 and last Five Years see Tables 15-31 following.)

Description of Establishment.	Number of Establishments.	Horsepower used.	Average (*b*) Number of Workers.	Salaries and Wages paid.	Costs of Manufacture (Other than Labour).		Value of Output (Goods Manufactured & Work done).	Value of Production (Output less Costs other than Labour).	Capital Value of—	
					Cost of Raw Material used.	Other Costs of Manufacture, excluding Depreciation.			Land and Buildings.	Plant and Machinery.

(*a*) The figure given here is an estimate of the total horsepower *applied to* electric generators, *not* the horsepower of electric current *generated*.
(*b*) Average for *whole* year.
(*c*) Output less Costs (other than Labour).
(*d*) Understated by approximately £695,000, compared with previous years, owing to valuation of Electricity at Generating Station instead of at Point of Sale.
(*e*) Understated by approximately £643,000, compared with previous years (see note (*d*) above).
(*f*) Valued on same basis as in 1940-41 (see notes (*d*) and (*e*) above).

(*a*) Collections at the Central Office (which for the whole of Australia amount to approximately one-third of the total) are not included.
(*b*) Actual Collections in Tasmania. The amount of duty collected in other Australian States on goods transhipped to Tasmania not included.
(*c*) Figures based on the assumption that the Customs and Excise Revenue per head in Tasmania, from 1913 onwards, bore the same proportion to the Customs and Excise Revenue per head for Australia that it did on the average for the nine years 1901 to 1909, for which years only full information is available. (The average per head, 1901 to 1909, in Tasmania was approximately 82% of the average per head for Australia. Later years has been taken as approximately 80%.
(*d*) Assuming similar proportion of Collections per capita as for Customs and Excise.
(*e*) Excluding Central Office Collections of Income, &c., Taxes.
(*f*) Including Flour Tax.

CONSOLIDATED REVENUE, 1937-38 TO 1942-43.

(a) Including Special Grants (Commonwealth) and Expenditure therefrom.

ACCUMULATED DEFICIENCY TO 30TH JUNE, 1943.

The figures in the above table do not provide a complete record of the Accumulated Deficiency in the State's finances, owing to the practice existing prior to the year 1933-34 of debiting Suspense Accounts with Revenue Charges. The following additional amounts should be added to the deficiency prior to 1934-35, as shown above, to arrive at the aggregate position:—

Accumulated Deficiency at 30th June, 1943.	£
Deficit as shown in above table	1,855,917
Losses on Returned Soldier Settlement	1,207,217
Loss on realisation of State Ships	61,260
Losses on Marrawah Tram	83,134
Hydro-Electric Depreciation Deficiency	47,211
Other	34,959
Total	£3,289,698

NOTE.—The above sum excludes suspended sinking funds and the non-provision of depreciation for replacement of certain capital assets of the State.

GOVERNMENT EXPENDITURE ON PUBLIC WORKS, 1942-43.

Taxable Income = Actual income, less concessional deductions (such as allowance for children, spouse, superannuation payments), and certain gifts and subscriptions, and income or wages tax paid in the previous year, and rebates of income.*

In arriving at the Taxable Income there is no provision for a statutory exemption as provided by the Act in previous years.

**Rebates of Income.*—As income from dividends of resident companies is not taxed in the hands of shareholders, s uch income from dividends is excluded from taxable income.

(*a*) Including periodic payments in reduction of principal.
(*b*) Much of the debt of Local Government Bodies is in the form of Instalment Debentures, which means a fixed periodic payment on account of interest and principal. For each debt, therefore, the payment on account of interest decreases and the payments on account of principal increases from year to year. These figures indicate the liability as at 30/6/43. (*c*) Charges in arrear, £218. (*d*) Not collected.

(*a*) Payments (£5 each) commenced as from 10th October, 1912. (*b*) Payments reduced to £4 from 23/7/1931, where income did not exceed £208. From 1st August, 1934, limit of income increased to £299 maximum by £13 for each previous living child under 14 years, and allowance increased by 5s. in respect of such child up to £5 maximum. On 21/9/36 income provision raised to £221, with allowance of £13 in respect of each surviving child under 14 years up to maximum income of £312.

On 1/1/38 the income limit is £247 with an additional £13 in respect of each surviving child under 14 years, the maximum being £338. The allowance is £4 10s. where there is no previous living child under 14 years, £5 where there are one or two previous living children under 14, and £7 10s. where there are three or more such children.

FRIENDLY SOCIETIES.

REPORT OF THE STATISTICIAN FOR THE YEAR 1942.

Hobart, 4th January, 1944.

SIR.

In accordance with Section 10 of the Friendly Societies Act, 1888, I have the honour to make the following report with respect to the year 1942.

(Note.—Figures in parentheses refer to the previous year—1941.)

Returns and Information.

District secretaries and secretaries of the larger lodges, together with all other persons who applied for them, were supplied with copies of the printed report and tables for 1941, showing the strength, progress, and financial position of the societies.

The returns relating to the year 1942 were examined as customary for compliance or otherwise with the Friendly Societies Act and the registered rules of each society. The result was pleasing, inasmuch as few irregularities were disclosed in the conduct of financial transactions.

Societies.

At the end of the year 1942 there were 20 (19) distinct friendly societies, exclusive of two dispensaries in Tasmania. The special societies, which consist of members of one firm or institution or of residents of one locality, and have no branches, numbered 7 (6), with a benefit membership of 20·8 (18·3) per cent of all societies. There were 13 (13) general societies with 149 (149) branches for males, 24 (25) for females, and 5 (6) for juveniles. The decrease in the number of branches operating resulted from 1 branch of the I.O.O.F. Grand Lodge closing down, 1 female branch of the P.A.F.S. being absorbed by a male branch, and 1 juvenile branch of the I.O.R. Tas. District going into recess for the duration of the war. Statistics covering the Burnie Associated Pulp and Paper Mills Employees' Medical and Accident Benefit Scheme are included for the first time.

Membership.

The total membership at the end of the year 1942 was 25,085 (24,722), which comprised 23,532 (23,087) in adult male lodges, 1383 (1452) in adult female lodges, and 170 (183) juveniles, showing a decrease of 352 benefit members in general societies and an increase of 715 in special societies.

The number of initiations in general societies during 1942 showed a total decrease of 152 for both sexes. These numbered 401 (531) in male lodges and 82 (104) in female lodges.

The average age of male members for 1942 was 45·7 (45·5), a slight increase on the figure for the previous year.

The following table shows the increase of the average age of adult male members of general societies for the years 1927, 1937, and 1942:—

Year.	Average Age.	Year.	Average Age.	Year.	Average Age.
1927	40·1	1937	43·0	1942	45·7

The following table relating to male members of general societies, which form the most important section of the total membership, shows very clearly, in another manner, the drift into the older age-groups:—

Age Groups.	1920.		1930.		1942.		1942 Members Distributed on Basis of 1920.
	No.	Per Cent.	No.	Per Cent.	No.	Per Cent.	
16-19 years	1605	7·79	1463	6·60	451	2·47	1420
20-29 years	5445	26·42	5117	23·08	2897	15·89	4816
30-49 years	9859	47·85	9613	43·37	7271	39·89	8723
50 years and over.....	3696	17·94	5975	26·95	7610	41·75	3270
Total Members whose Ages were specified	20,605	100·00	22,168	100·00	18,229	100·00	18,229

Sickness and Mortality.

A slight increase in cases of sickness was experienced in friendly societies during 1942, the number in adult male lodges being 4331 (4231), while the duration of sickness in days fell to 270,715 (272,956). The average length of sickness per case decreased to 62·5 (64·5) days. In female lodges the cases of sickness increased to 246 (240), and the days of sickness fell to 14,287 (15,892), the average length of sickness, per case, being 58·1 (66·2) days.

Details of sickness over the past six years are given in the following table:—

Year.	Cases of Sickness.	Total Duration.	Average Length of Sickness.	Sick Payments.	Sick Pay per Financial Member.
	No.	Days.	Days.	£	£ s. d.
1937	5158	335,394	65·0	32,837	1 7 1
1938	4816	304,667	63·3	28,531	1 4 2
1939	5057	298,203	59·0	29,641	1 5 4
1940	5470	324,311	59·3	29,242	1 4 9
1941	4471	288,848	64·6	25,780	1 1 7
1942	4577	285,002	62·3	25,554	1 1 1

During 1942 there were 316 (317) adult male deaths in friendly societies and 12 (15) female, making a total of 328 (332). The number of deaths of registered wives was 121 (135), the funeral payments relating thereto being £1666 (£1851).

Funds.

Exclusive of dispensary stock, valued at £8377 (£8420), accumulated funds by the end of 1942 amounted to £536,629 (£515,390), and the capital per financial member was £22 2s. 2d. (£21 11s.). The rate of interest earned by the funds was 4·4 (4·6) per cent.

Receipts.

Net revenue for 1942 was £132,854, the chief items being members' contributions and levies £92,585 (£87,097); interest, dividends, &c., £23,568 (£23,559); and miscellaneous items £16,465 (£12,054).

Expenditure.

Of the net expenditure of £111,658 (£114,550), the greater part was distributed in payment of benefits for members, which totalled £82,209 (£81,675). These comprised £25,554 (£25,780) sick pay, £34,288 (£32,735) medical expenses, and £22,367 (£23,160) funeral donations. Of the remaining expenditure, £21,464 (£21,203) represented cost of administration, and £7985 (£11,672) miscellaneous payments.

Further details under the several headings enumerated may be found on pp. 5 to 18.

Effect of War on Friendly Societies.

In June 1940, at the request of the Societies, the Friendly Societies (War Service) Act was passed to assist Friendly Societies to pay death claims in respect of members dying on active service. The chief provisions of the Act are summarised in previous reports.

Up to the end of December, 1942, 1202 members were insured for a total death benefit of £78,852, but only ten claims for £690 had been paid. The credit balance of the fund was £5061.

Conclusion.

The last actuarial valuation of the societies' assets and liabilities was made at the end of 1934, and consideration will have to be given to a new one as at the end of 1944.

Previous reports have stressed the necessity for fresh legislation to bring the Act up to date, and each year that passes adds to the difficulty of maintaining the friendly societies on a satisfactory financial basis.

H. J. EXLEY,
Government Statistician and Deputy Commonwealth Statistician.

The Hon. the Attorney-General,
Hobart.
